SYNOPSIS
Environmental
issue?

The SYNOPSIS platform

Integration and sharing of knowledge in support of sustainable environmental management

The SYNOPSIS platforms are organised around four main axes:

- Context knowledge
- Conceptual models
- Assessments and models
- Scenarios

A platform can be developed using any integrated assessment framework : system approach, DPSIR, ecosystem services.....

Most importantly, each component should be co-constructed as much as possible.

VALMER

**VALMER Interreg 4A Channel project
(2012-2015).**

Coordination by M. Philippe, J. Ballé-Béganton and D. Bailly

Once developed and depending on the targeted audience, the SYNOPSIS platform can be :

- in a modelling format
- translated in a web site
- communicated in different formats (brochures, cartoons, ...).
